

## Ballista 2

First check all the steps from the previous lesson.

Break and file down the “wing”

Then place the ballista on the table, when the trigger is facing up (red circle)

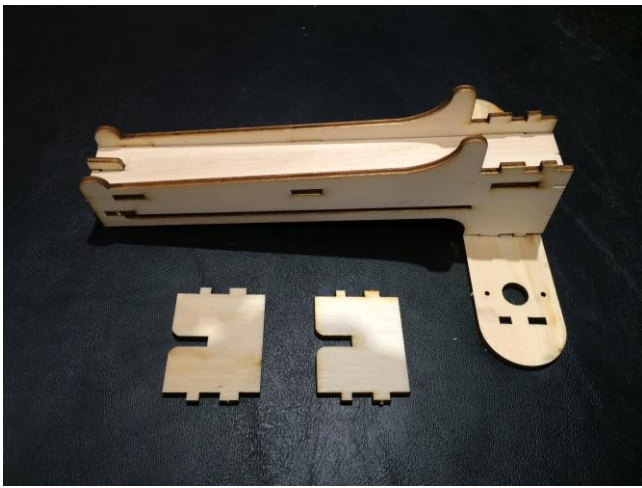

Glue the “wing” on the front of the ballista,

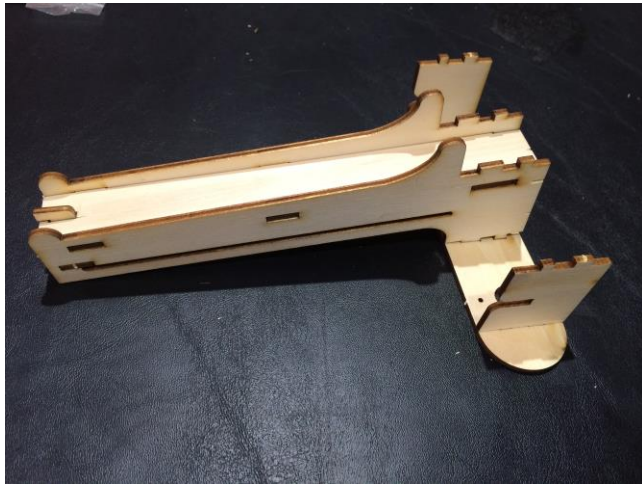

Make sure the arrows on the wing are facing up (green circle)

After checking all the models, flip it over as shown in the picture

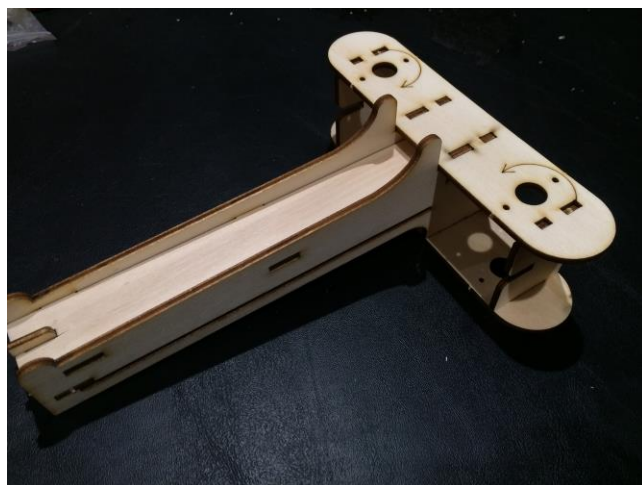

Break and file down the parts shown in the picture

Glue the parts to their proper place on the wing

Break and file down the 2<sup>nd</sup> wing.

Glue the 2<sup>nd</sup> wing to its proper place, Please see the arrows are facing up.

Important tip:

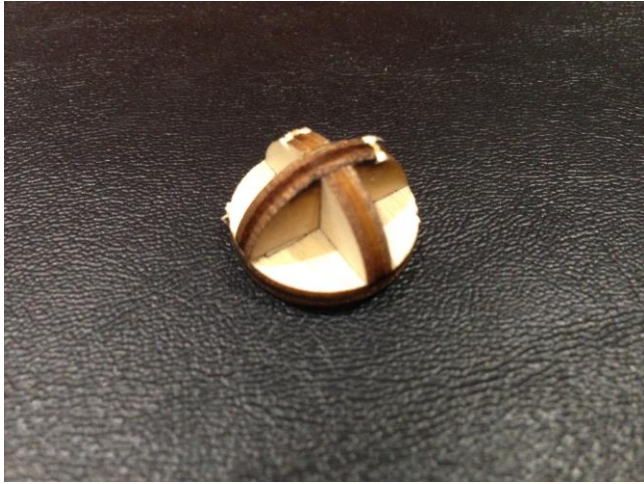

**WRAP BOTH WINGS WITH 1 OR 2 RUBBER BANDS ON EACH SIDE TO MAKE SURE THE PARTS DRY CORRECTLY.**

Break and file the parts as shown in the pic.

Glue the first part as shown in the picture

Only then glue the 2<sup>nd</sup> part crossing the first one.

Do the same thing on the other side

Once you are done,  
you have a “rock” to  
launch.

Go through the same  
process for the 2<sup>nd</sup>  
“rock”
