

Crawler 3

Break and file the parts as shown in the picture

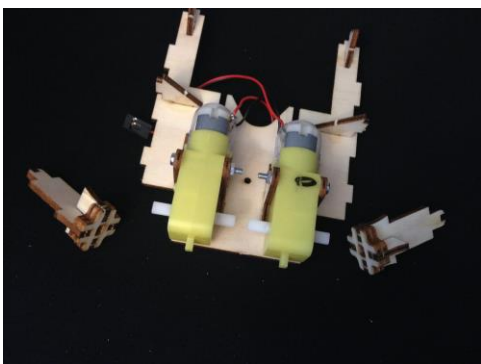

Make sure you have all 4 parts

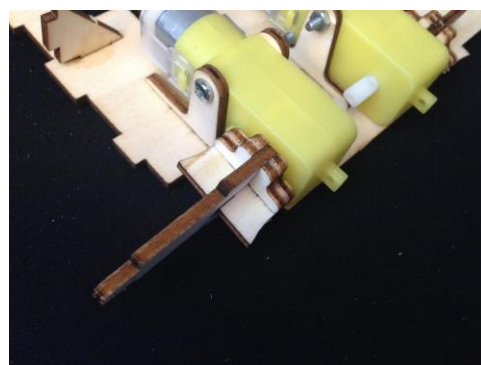

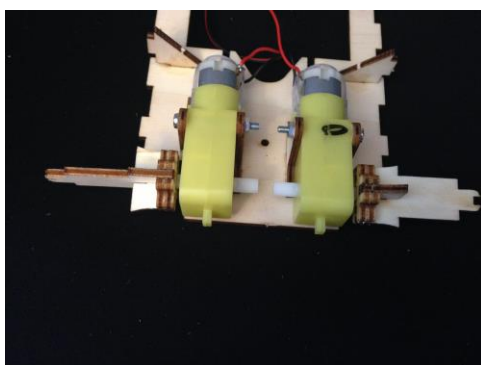

Place the round pieces one the table when the holes face opposite directions!!!

Only glue the 4 strips onto the round parts

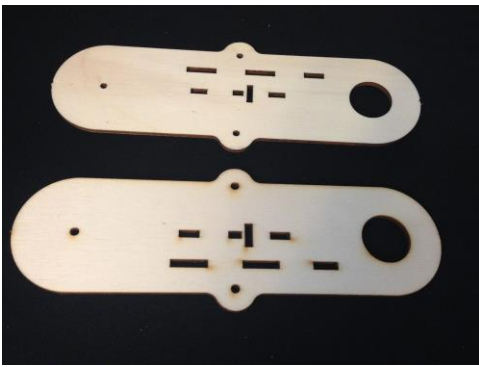

We are going to connect the hinges to the motors

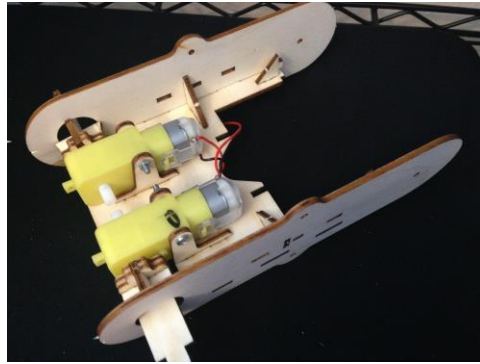

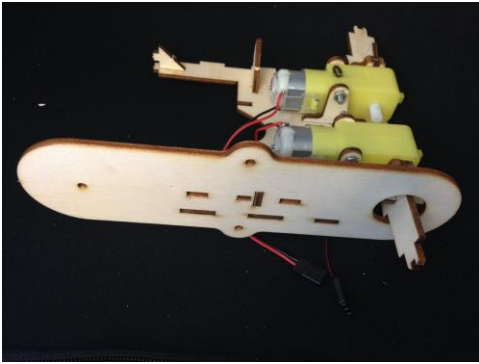

DO NOT USE GLUE!!

Just place the hinges onto the motors

Carefully break and file the parts as shown in the picture.

Please notice these are not the parts we just glued.

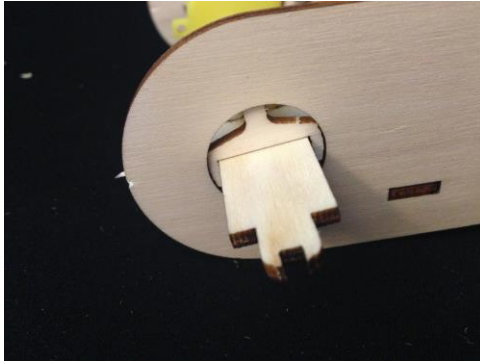

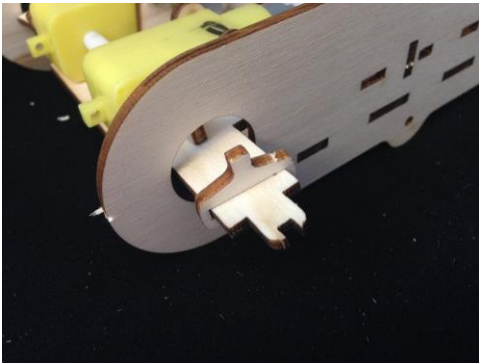

Glue one wall to the side of the base. Make sure the parts are inserted all the way with no spaces between the parts.

Do not put glue on the hinges!

After doing one side, please assemble the other wall as well.

CAREFULLY, break and file the parts as shown in the picture.

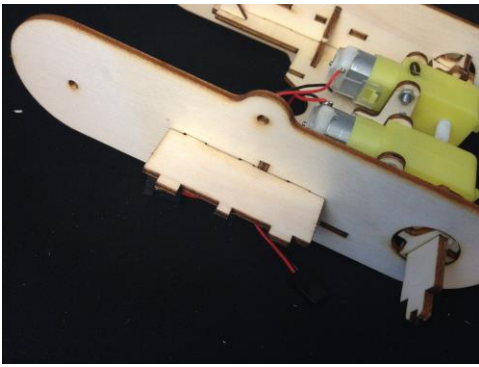

Push the part on the hinge, and slide it all the way down.

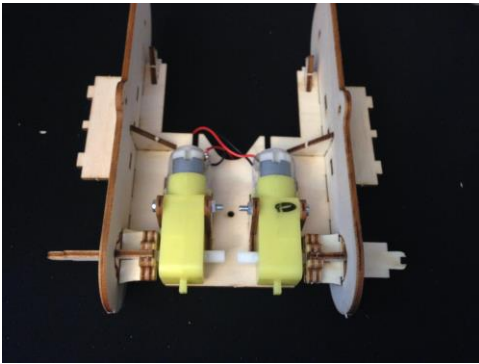

Do the same on both side.

Break and file the parts as shown in the picture.

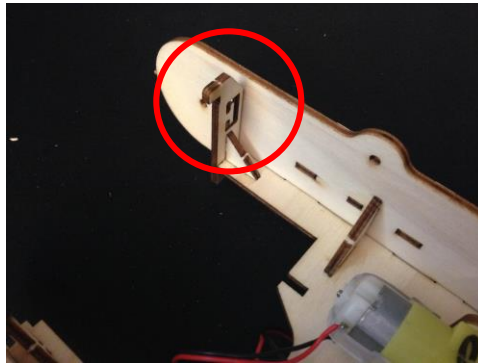

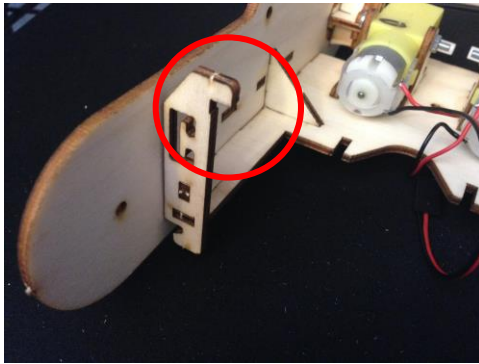

Glue the part on the side of the wall

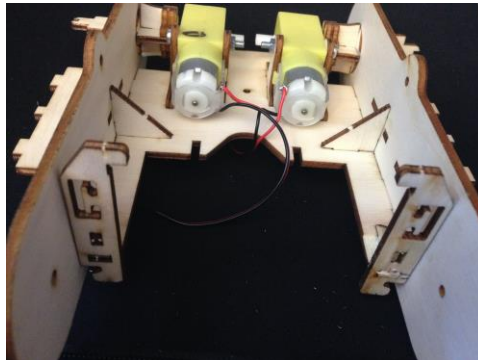

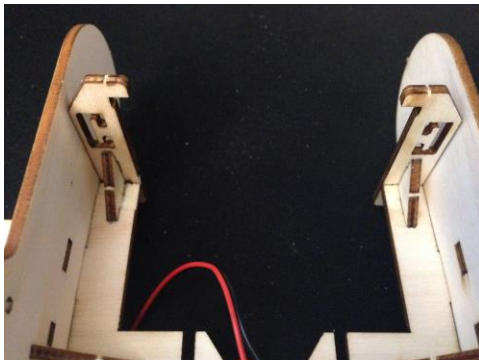

Once done, do the other side as well

Carefully break and file the parts as shown in the picture

We are going to glue this part on the inner side of the wall. Please make sure the bump is on the top (look at red circle). The part should be facing each other, and create some kind of a gate.

Check again all directions and part before ending class.
